
Corpus
100 full texts on Corpus Linguistics (2015–2025)
EN: 50 texts, 1.45M tokens
ES: 50 texts, 0.95M tokens
PDF extraction, cleaning, spaCy (trf) processing
Annotation
1. Seed terms (CASS glossary, 38)
2. Hybrid extraction (POS patterns + termhood)
3. Full manual reading (Doccano)
Validated term inventory
261 entries (terms / entities)
Annotated corpus (BIO)
all forms projected onto the texts
Evaluation protocol
Sample X% of term entries (X = 10, 20, 30, 50; 10 draws)
Test: sentences with a reserved entry
Train: all other sentences
Validation: 10% of training entries (epoch selection)
Statistics and PMI computed on training only
Contrast: random 5-fold CV
Models
Token classifiers (27 features, no sequence)
CRF (27 features + sequence)
BiLSTM-CRF (embeddings learnt from scratch)
XLM-RoBERTa (pretrained, fine-tuned)
Analyses
Term F1, P, R; span F1 (exact / partial)
Recall on seen vs. reserved types (B-T / I-T)
OOV words, frequency bands, error typology
Feature ablation (CRF) with reserved recall
External validation: ACTER (reservation, LODO)
