
Glossary entries
corpus
reference corpus
keyness
corpus linguistics
learner corpus
concordance
lemma
draw X% of the entries (X = 10, 20, 30, 50)
Sentences
a reference corpus was compiled
corpus linguistics relies on concordance lines
each form is reduced to its lemma
keyness measures salience in a corpus
the learner corpus contains essays
a sentence containing any reserved entry goes to the test set
Training
seen terms only; statistics and PMI computed here
Validation
10% of the training entries; chooses the epoch
Test
reserved + seen terms; recall measured separately
Models (same partitions)
Token classifiers
CRF (27 features)
BiLSTM-CRF
XLM-RoBERTa
evaluated once
10 draws × 4 levels
paired tests on shared draws
reserved terms are never seen in training
